

High-Performance Crosswalks

High-Performance Crosswalks

Durable

StreetPrintXD stands up to extreme use and weather.

StreetPrintXD is applied to existing pavement and does not disrupt the surface. This eliminates the risk of heaving and settlement and ensures a smooth, pedestrian-friendly surface.

Practical

StreetPrintXD makes economic sense.

- Fast and efficient installation means you invest less up front
- Durability means low maintenance which translates into savings in the long term
- Repairs can be made with minimal disruption.

Safe

StreetPrintXD is road-safe.

- Smooth and trip-hazard free
- Skid and slip resistant
- A friendly solution for the physically challenged, StreetPrintXD complies with the Americans with Disabilities Act (ADA).

What is StreetPrintXD?

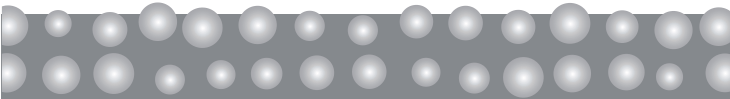

Unlike conventional thermoplastic road markings StreetPrintXD incorporates a unique aggregate-reinforced formula with unprecedented wear resistance. When installed using the patented StreetHeat asphalt reheating technology StreetPrintXD permanently bonds to the asphalt.

StreetPrintXD
180 mils thick aggregate reinforced thermoplastic

Regular thermoplastic
90 mils thick with glass beads

Quality Assured Cost-Efficient Installation

Crosswalks take hours, not days, to install, minimizing traffic disruptions.

Can be installed at night.

Accredited applicators ensure your project is installed on time, on budget and to the highest standard.

Gently heat and soften asphalt
